Designed with melanin-rich skin in mind. Your provider confirms candidacy, settings and timing.

Laser works best on darker hair. Gray, white, blonde and red hair may not respond effectively.

Individual results vary • Package categories are confirmed at booking

KNOW WHAT TO EXPECT

YOUR SMOOTH & CLEAR PLAN

FACIAL HAIR FOCUS

Reducing repeated shaving and tweezing can help interrupt the cycle of ingrowns, razor bumps, beard shadow, irritation and dark marks.

HOW PROGRESS CAN BUILD

01

SESSIONS 1-2

Treated hairs begin shedding over the following weeks.

02

SESSIONS 3-5

Regrowth may become slower, finer and patchier.

03

SESSIONS 6-8

Visible reduction builds. Maintenance may still be needed.

Laser offers long-term hair reduction, not guaranteed permanent removal. Facial and hormonal hair may need maintenance.

BEFORE EVERY VISIT

- Shave the area about 24 hours before.
- No waxing, tweezing or threading for 4 weeks.
- Avoid tanning and self-tanner.
- Pause retinoids and acids for 3 to 5 days.
- Arrive with clean skin and report health changes.

AFTER EVERY VISIT

- Cleanse gently and use an approved moisturizer.
- Avoid heat, sweat and friction for 24 to 48 hours.
- Pause retinoids and acids for 3 to 5 days.
- Use SPF 30+ and avoid direct sun.
- Do not wax or tweeze between sessions.

CONTACT US FOR: blistering, scabbing or worsening pain. Mild redness or tenderness can be normal for 1 to 3 days.

QUICK ANSWERS

SAFE FOR DARKER SKIN?

Yes, with appropriate technology, settings and provider experience for your skin tone.

WILL DARK MARKS FADE?

Reducing ingrowns can help prevent new marks. Existing pigment may need separate corrective care.

WHAT IF I HAVE PCOS?

You can still benefit, but hormones may make additional sessions or maintenance necessary.
